

Java

```
class Solution {  
    public int hIndex(int[] citations) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number[]} citations  
 * @return {number}  
 */  
var hIndex = function(citations) {  
  
};
```

C++

```
class Solution {  
public:  
    int hIndex(vector<int>& citations) {  
  
    }  
};
```

C#

```
public class Solution {  
    public int HIndex(int[] citations) {  
  
    }  
}
```
