```
Java
class Solution {
    public int hIndex(int[] citations) {
    }
}
JavaScript
/**
 * @param {number[]} citations
 * @return {number}
 */
var hIndex = function(citations) {
};
C++
class Solution {
public:
    int hIndex(vector<int>& citations) {
    }
};
C#
public class Solution {
    public int HIndex(int[] citations) {
    }
```

}
